Defining User Criteria in the Default Environment

The default environment is designed for personal productivity. Hundreds of apps have outgrown the Default environment. Those apps are considered enterprise level apps and should be moved to new environments.

Using the table below and based on the need to identify apps that exceed the requirements below, the spreadsheet exported for the COE report attached below was generated.

More details and this table can be found at Manage and govern the default Power Platform environment - Power Platform | Microsoft Learn

Parameters	Defining criteria	Environment
Number of users	1–10 users	Default
	7–30 users	Shared
	>30 users	Dedicated
Nature of data	Highly confidential	Dedicated
	Confidential	Shared
	Not confidential	Default
Monetary or reputational impact	Yes	Shared or Dedicated
	No	Default
Requires ALM	Yes	Shared or Dedicated
	No	Default

The spreadsheet, exported directly from the COE, is a detailed view of the Platform's Default Environment.

A few key metrics are "Unique Users", "Users Shared With", "Shared Groups", "Is Orphan", and key date information.

Power App Admin Details in Default Environment.xlsx

Report Overview/Findings

Definitions

Unique Users: Count of Unique App launches by a single individual user.
Users Shared With: Total count of individual users with access - not group access.
Shared Groups: Total count of groups providing app access.

Reviewing the report revealed the following findings.

Unique Users > 10 users = 441 apps

Users Shared With > 10 users = 80 apps

Count of Orphaned apps = 3883

IMPORTANT

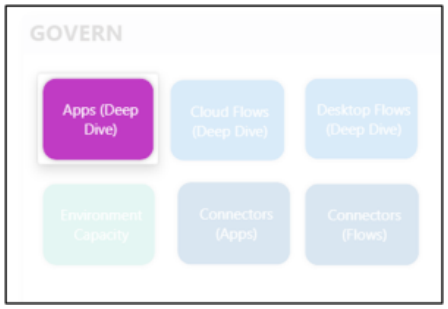
It was found that the "Shared Groups" should be review for each app due to the possible access being granted.

This example below shows The Admin Leave Report app. Considering the above definitions, the app allows too much user access. The Unique users shows that app has been launched 9604 times.

App Name	Users Shar	Shared groups	Unique Users	Latest Launched on	Environment Name	App Owner
Admin Leave Report	1	2	9604	8/21/2025 1:06:18 AM	Department of Homeland Security (default)	Mao, Laiqur
User Review for Admin Leave Report						
User ID	Role Name	User Name	eMail	Department	Type	Group Size
0804369d-8556-44f6-8955-32d354554982	Owner	Mao, Laiqun	Laiqun.Mao@hq.dhs.gov	MGMT/OCHCO/HCBS	User	1
60f49bfa-55f2-4c22-90ba-4394654103a2	User	SG_ST_ALL_Guest			Group	1048
f2139438-416a-448b-8b16-76e2c6fa982f	User	SG_DHS_ALL			Group	>100000

The source is from the COE Power BI report page under Govern.

By clicking the tile, "Apps (Deep Dive)" which can be viewed HERE.



Clicking that tile will lead to the App details.

Note below that by Right-Clicking on a row, opens the "Drill-through" menu. Going to Review App Shares give the above group & user access info.
