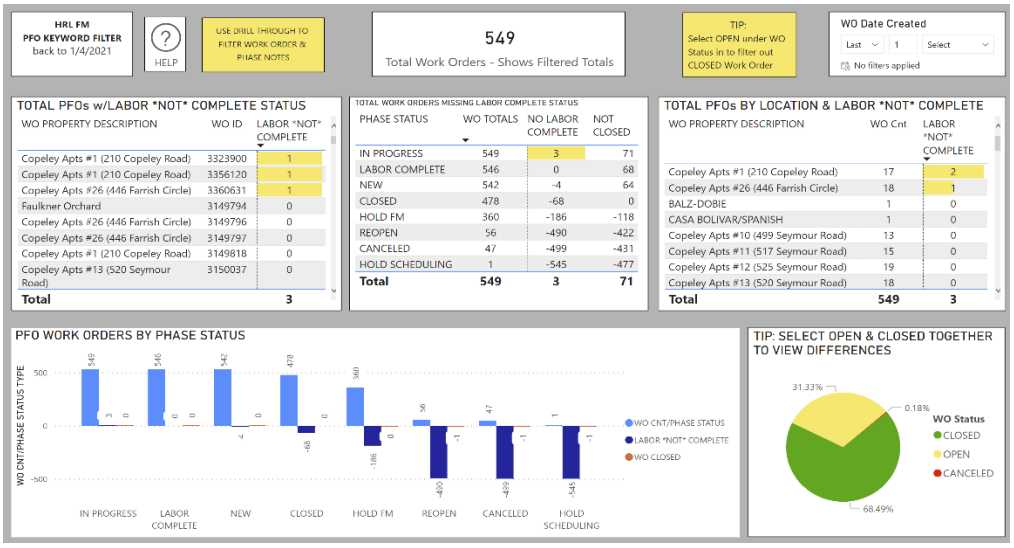
PFO KEYWORD REPORT GUIDE

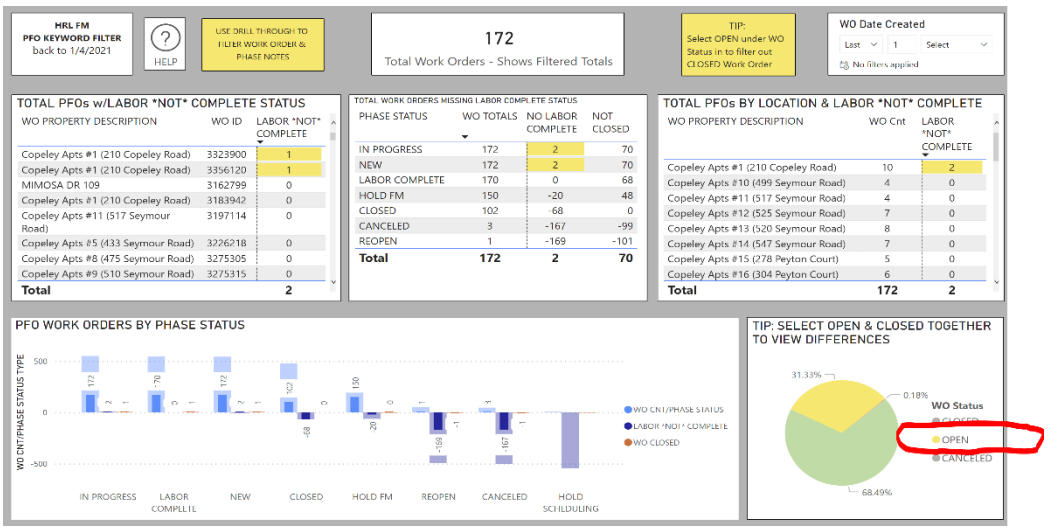
The PFO KEYWORD REPORT filters and shows the totals of Work Order's using the KEYWORD "PFO" in the text description that are still considered OPEN and the Phase Status: LABOR COMPLETE has not been entered. Note report image below:

1. The center table highlights 4 work orders where LABOR COMPLETE has not been entered.
2. The table to the left shows the count of work orders at a location and the count of work orders where LABOR COMPLETE has not been entered for that location.
3. The table to the right shows the location and work order number in question.

Exceptions: It is possible for a work order to be "CLOSED" without a LABOR COMPLETE status. This will typically be when a Work Order is CANCELLED.



STRATEGY: Select OPEN in the pie chart to filter out all open work orders. (Notice cancelled WO is removed)



WORK ORDER ID DRILL THROUGH

Right-click on WO ID to view more information filtered by that ID on the next page.

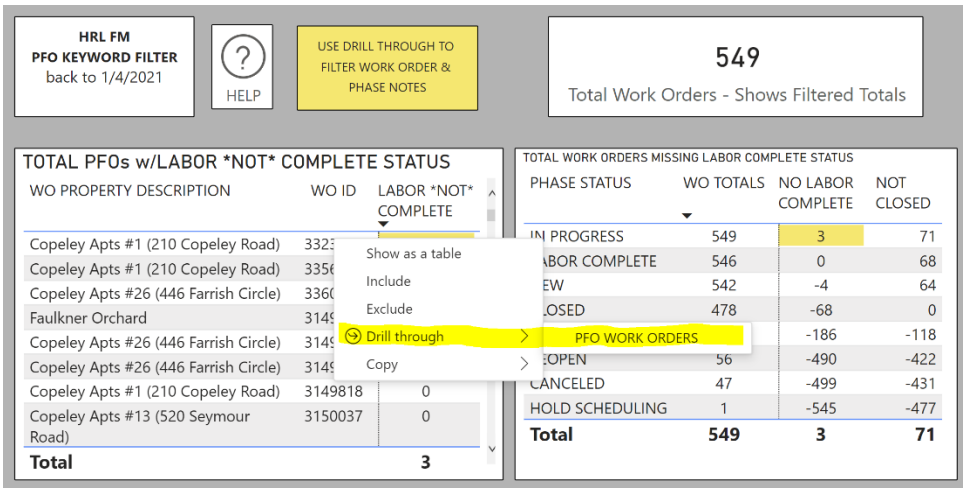


Table to filter by the work order number and show WO & Phase Notes.

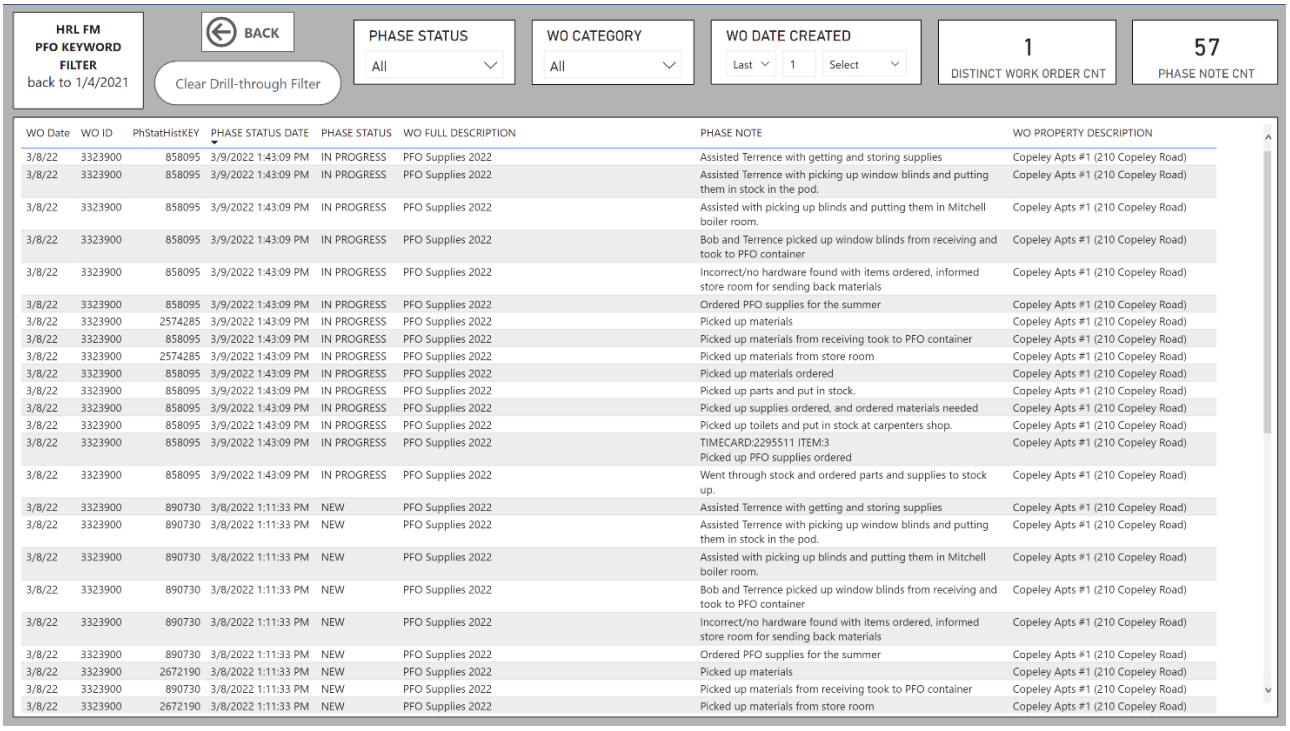

WO Date	WO ID	PhStatHistKEY	PHASE STATUS DATE	PHASE STATUS	WO FULL DESCRIPTION	PHASE NOTE	WO PROPERTY DESCRIPTION
